PROFILE

Full stack Developer with 3+ years of professional experience building modern, accessible and performant web applications. Specialized in Angular and TypeScript for enterprise environments, with hands-on experience in Next.js for client projects. I help businesses ship polished web experiences — landing pages, web apps and e-commerce — with clean code, clear communication and measurable results.

PROFESSIONAL EXPERIENCE

Frontend / Full Stack Developer

Técnicas Competitivas S.A. — Spain / Nov 2021 – Nov 2024

- Developed and maintained business web applications using Angular, TypeScript, HTML5 and SCSS.
- Implemented new features and improved existing interfaces with a strong focus on usability and responsive design.
- Collaborated closely with backend developers working with .NET Core and Node.js.
- Optimized SQL Server queries, improving performance of internal business processes.
- Participated in Agile teams (Scrum / Kanban), contributing to planning, reviews and continuous improvement.
- Worked with Git-based workflows, code reviews and issue tracking.

Junior Full Stack Developer (Internship)

Ultebra Solutions — Spain / Apr 2021 – Nov 2021

- Contributed to the development of web applications using Angular and .NET Core in production environments.
- Assisted in maintaining existing projects and implementing new functionality.
- Gained experience working in multidisciplinary teams following Agile methodologies.
- Applied clean code principles and frontend best practices.
